DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-9 and 19, drawn to an N x M optical switch module and switching architecture, classified in class 398, subclass 56.
 - II. Claims 10-18 and 20-27, drawn to fault isolation for an optical switching architecture, classified in class 398, subclass 2.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as subcombination and combination, respectively.

Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination (invention II) as claimed does not require the particulars of the subcombination (invention I) as claimed because the fault isolation method steps of invention II may be performed in an optical communication system with a switch design other than the particular switching architecture recited in invention I. The subcombination (invention I) has separate utility such as an optical switching architecture for transmitting signals in an optical communication system that does not necessarily require the fault isolation recited in invention II.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 2633

4. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

6. Applicants are advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

7. Applicants are reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
